Bio Tech is unique

Bio Tech is a product by Papernet that uses **Biologic Active Tissue Paper technology** exclusive in Europe.

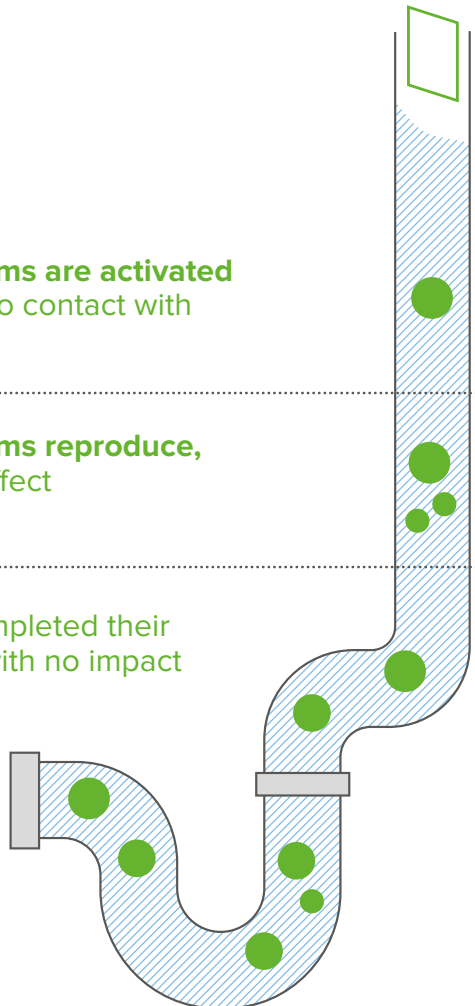

It is an **innovative toilet paper** containing **5 types of natural microorganisms** (harmless for people and for the environment) that, upon activation through contact with water, produce enzymes that feed on the incrustations and organic substances present in pipes.

How Bio Tech works

The natural microorganisms are activated when the paper comes into contact with water.

The natural microorganisms reproduce, multiplying the cleaning effect exponentially.

Once the agents have completed their action, **they biodegrade** with no impact on the environment.

Bio Tech is better

Bio Tech is the toilet paper that **reduces odours and the effects of dirt.**

It is **dermatologically tested**: does not interfere with skin and with the mucous membranes of intimate areas.

It transforms a daily action like throwing toilet paper in the WC into a **gesture of respect and protection for the environment.**

Reduces the risk of clogs and helps keep pipes and sewerage systems clean.

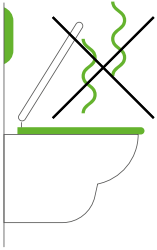

With *Bio Tech* you save money

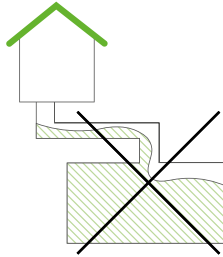

In just 4 weeks, Bio Tech **contributes to keeping sewerage systems, septic tanks and inspection pits clean.**

Substantially reduces extraordinary maintenance costs, costs for cleaning and other chemical/mechanical interventions on sewerage systems.

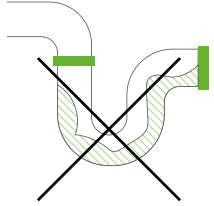

1 *Reduces odour*

2 *Reduces clogging*

3 *Reduces blockages*
