

KitchenPro

Cleaner • Safer • Healthier

ECOLAB®
Everywhere It Matters.™

The first challenge is to establish a clean and safe kitchen

Key challenges:

- ▲ Maintain food safety
- ▲ Ensure employee safety
- ▲ Increase productivity

Trips and slips caused by **wet or slippery floors** and **incorrect use of dangerous substances**, such as corrosive ready to use cleaning products, are among the **most common incidents** that occur in foodservice environments.

“Not running a food operation according to HACCP principles can lead to heavy penalties up to business closure, not to mention endangering consumers!”*

EVEN WITH GOOD
RISK ASSESSMENT
AND PREVENTION
MEASURES,
INCIDENTS CAN
STILL OCCUR.

KitchenPro helps to maintain hygiene standards

KitchenPro the Kitchen Hygiene Programme

- ▲ Innovative products and systems
- ▲ Safely achieve hygienically clean results
- ▲ Save time and control cost
- ▲ Regular onsite training and support
- ▲ Solutions that offer a tangible impact to sustainability

“Cross contamination is one of the **most common causes of food poisoning**. It happens when harmful germs are spread onto food from other food, surfaces, hands or equipment”*

*Food Standards Agency, UK. www.food.gov.uk

KITCHENPRO DES IS
BACTERICIDAL AND
FUNGICIDAL ACCORDING
TO EN1276, EN1650, EN13697
AND EFFECTIVE AGAINST
NOROVIRUS

Caustic oven cleaners used incorrectly can cause burns, eye irritations and respiratory damage

Greaselift™

Is the only non-caustic oven and grill cleaner to achieve outstanding results and without the need for PPE.

Performance matters...

- ▲ As effective as caustic oven cleaners
- ▲ Penetrates grease quickly
- ▲ Daily and deep cleaning of ovens, grills, hoods and vents
- ▲ Aluminium safe
- ▲ Easy to use

Safety matters...

- ▲ Positively promotes a safer working environment
- ▲ No PPE required (Personal Protective Equipment)
- ▲ Eliminates risks normally associated with aggressive oven cleaners
- ▲ No noxious odours, safe for others working close by

Sustainability matters...

- ▲ Making a positive environmental impact
- ▲ Biodegradable concentrate
- ▲ Dispensed into reusable spray bottles, helping to significantly reduce packaging waste

60%

of **requests for compensation** from operational injuries during 2010 and 2011 were linked to **skin irritations**

17%

of above **requests** were linked to **respiratory issues***

Greasy floors present serious slip and trip hazards, especially near grills and fryers

Attacks the **greasy build up** on slippery kitchen floors, helping **reduce slips and falls**.

Breakthrough technology. Patented formula uses enzymes for superior cleaning.

- ▶ **No rinse.** Leave the cleaner on the surface to work its magic
- ▶ **Eats grease.** Special enzymes break down all types of kitchen grease
- ▶ **Continual action.** Enzymes work during and after application
- ▶ **Concentrated cleaning.** Get extra cleaning exactly where you need it
- ▶ **Sustainable.** No rinse floor cleaner saves water and works with cold water

Studies prove Wash'n Walk **increases slip resistance**, therefore making floors safer.

Ecolab Territory Mangers **work closely with your teams** helping you concentrate on your core business, rather than continuously checking cleaning teams are following correct procedures.
